## About Us

As the leading all-media information service platform in the field of electronics technology, EEPW is committed to providing a full range of technical services to millions of electronic design developers, from college students in school, to rookie engineers in the workplace, from solo system developers to software architects, and even passionate electronics enthusiasts and geeks. They can find the design development knowledge and related design services they need from the intimate services of EEPW's various media platforms.

## About Us

In 2022, EEPW will continue to build a media platform covering publications, online seminars, offline conferences, university services, WeChat public number and video platform, and other media distribution channels to provide multi-channel and comprehensive technical information content services for electronic design developers.

We have not only experienced senior editors, but also young media professionals with active minds. We are not only good at writing traditional media reports, but also familiar with new media operation and promotion methods and the whole process of multimedia content from planning to production. From in-depth understanding of the industry, to the most cutting-edge technology development analysis; from the analysis of industry focus events, to career development planning advice; from the review of the development of the electronics industry documentary, to the full live creator marathon; from the latest product release information, to the most practical design and development skills ..... as long as the electronic engineers need to understand the content, we will be happy to provide you with.

**With the help of EEPW's various communication platforms, we will provide you with.**

# Content Services

---

## Marketplace

Veteran market participants dissect popular market trends, with a focus on motor drives, robotics, smartphones and more.

## Technology

Internet of Things, wearables, automotive electronics, smart manufacturing, and drones were the focus of coverage.

## Design

Academic or engineering papers from universities and institutions are more relevant to the R&D needs of engineers.

## Interviews

Digging into hot people and new products, showcasing industry leaders and revealing the new technology behind new products.

## Editorial Resource

We have a dedicated team of senior editors, all of whom have over ten years of editorial experience and specialize in different fields and technologies.

In addition, we have a team of more than 20 expert consultants, some of whom have been engaged in electronic intelligence for more than 30 to 40 years, some from universities such as Tsinghua University and Peking University, industry associations / societies, and wellknown Chinese and foreign enterprises, who review and revise the content of this media, and provide advice on the direction of the content. At the same time, we continue to train young editors to enrich and strengthen our team.

## Technically rich areas

Covering embedded systems, analog ICs, power management, LEDs and drivers, automotive electronics, industrial control, test and measurement, Medical electronics, mobile/portable, security, communications, IoT, 3D printing, etc.

## Contact Us

Ken Lee [ Chief Editor ] Email: [lijian@eepw.com.cn](mailto:lijian@eepw.com.cn)

Specializes in communications technology, consumer electronics, embedded systems, semiconductor processes, RF and analog, and test and measurement.

Ying Wang [ Editor-in-Chief ] E-mail: [wangying@eepw.com.cn](mailto:wangying@eepw.com.cn)

He specializes in embedded systems, FPGAs, power management, analog ICs, etc. He is now responsible for the overall planning of the magazine, as well as the editing and interviewing of features, popular technologies, high-end interviews, China Core, etc

# Website Registered User Analysis

## Analysis of business types

Industry Type Analysis	Number of registrants	Proportion (%)
consumer electronics	146,822	14.81%
Communications equipment and systems	143,698	14.50%
Internet of Things (IoT)	138,454	13.97%
Industrial controls and safety devices	123,527	12.46%
Power supply and power management	71,737	7.24%
Instrumentation	62,490	6.31%
Automotive Electronics	50,848	5.13%
IC design and manufacturing, testing	49,006	4.94%
New energy (green energy, renewable energy)	38,393	3.87%
Medical Electronics	31,464	3.17%
Aviation, marine and military electronics	29,876	3.01%
Component design and manufacturing	28,250	2.85%
Power Electronics	25,311	2.55%
Electronic production equipment	24,565	2.48%
Security	20,446	2.06%
Other	6,191	0.62%
<b>Total number of registrants</b>	<b>991,078</b>	<b>100.00%</b>

## Analysis of job duties

Analysis of job functions	Number of registrants	Proportion (%)
Design Development	490,542	49.50%
Academic research	148,149	14.95%
Technology management	144,888	14.62%
Test measurements	71,182	7.18%
other than it	37,828	3.82%
Technical support, maintenance	37,490	3.78%
Sales & Marketing	24,039	2.43%
Business management	22,363	2.26%
Procure	14,597	1.47%
<b>Total number of registrants</b>	<b>991,078</b>	<b>100%</b>

## Geographical distribution analysis

Geographical distribution analysis	Number of registrants	Proportion (%)
Guangdong	183,658	18.53%
Beijing	112,267	11.33%
Shanghai	83,855	8.46%

# Website section introduction

In 2022, EEPW will continue to build a media platform covering publications, online seminars, offline conferences, university services, WeChat public number and video platform as the main platform to provide multi-channel and comprehensive technical information content services for electronic design developers.

- Special Reports & News:** Contains the latest product, design technology and business information. A rich collection of design examples and solutions, including the technology areas of interest and development direction. The technical sections are divided into Embedded Systems, Analog Technology, Power & New Energy, Optoelectronic Display, EDA/PCB, Test & Measurement, Automotive Electronics, Industrial Automation, Consumer Electronics, Medical Electronics, Mobile & Wireless Communications, Components/Connectors, Security & Defense, IoT & Sensors, Networking & Storage, and Smart Computing.
- Download:** Provides various electronic product design resources, EETV, circuit diagrams, and online tools for easy access and use.
- Technical sub-station:** Technical sub-station to technology for the aggregation, the most concerned about the technical classification of the content of the net users organized into technical sub-station, technical sub-station content includes: information, technical articles, downloads, video, discussion area.
- Industry leader Talks:** industry engineers to the industry a technology or product depth of analysis, to bring the net friend experience class, comparison class, summary class series of technical articles system.
- High-end interviews:** Representative executives are invited to take the pulse of the industry, analyze and forecast the relevant technology and market, and discuss the company's strategy to serve the Chinese market with the characteristics of the Chinese market.
- EEPW Original:** Based on the current hot and cutting-edge technology, interviews with several or one industry leaders and industry alliance leaders, analyzing the characteristics of a certain technology, predicting its trend, introducing the industry's major manufacturers and the latest products, etc., so that readers can have a more comprehensive overview of a hot or cutting-edge industry.

# 2022 Editorial Focus

The biggest change in the editorial content in 2022 is to create six key technology topics in the form of multiple media presentations. The topics will bring together a variety of content such as technology frontiers, views of famous experts, enterprise interviews and technical reference solutions, combining multimedia forms such as video interviews, roundtable discussions, short video science and technology reviews to bring readers the most intuitive technology frontier development trends and design know-how.

Around the key topics once every two months, we will focus on the latest technology developments of the technology direction throughout the year, keep the continuous content of each topic updated, and summarize the information and dynamics of relevant enterprises according to the actual characteristics of technology applications, so as to build a direct communication channel between developers and technology development enterprises.

## Thematic plan for 2022

Title of topic	Deadline for submission	Release Date
Annual Electronics Industry Review and Outlook	2021.12.20	2022.1.20
High efficiency motor control system design	2022.2.20	2022.3.20
Edge AI and AI Applications	2022.4.20	2022.5.20
Power and power semiconductors to help "double carbon" to meet the standard	2022.6.20	2022.7.20
Automotive Electronics in the Age of Smart Connections	2022.8.20	2022.9.20
Connected Technology for the Internet of Everything	2022.10.20	2022.11.20

# 2022 Let's develop it together!

In 2022, we will focus more on the needs of individual developers and work with the majority of developers to find their value in development.

We hope to cover every developer related to electronics, whether silicon farmer, code farmer or board farmer, from rookie college freshmen, to college competition players, from novice engineers, to whole design gods, from software programmers to system architects. From electronics hobbyist to creator geek .....

Our service system is no longer just to spread electronic design knowledge and the latest product technology information, we hope to start from the developer's life, covering all aspects of the developer's daily needs, not only the dissemination of basic knowledge, but also the latest technical developments, and mature designs to provide reference, and a variety of big names to answer questions and solve problems, and even get hands-on experience with development boards and the latest software and hardware tools! Of course, we also provide a stage for developers to show their personal style and show who you are outside of work!

In 2022, we'll launch a Developer Collaboration Program, inviting developers to talk about development, share design tips, showcase reference designs, and take beginners on an advanced leap from beginner to master. And all this, developers will gain the rewards of full personal fulfillment and tangible financial rewards through our Developer Partnership Program.

# Forum activities in 2022

## Mind Trolley

Based on 8051 microcontroller, head wear brain wave sensor, using brain waves to control the car to move, the more attention the car movement speed.

## Simple electronic instruments

Based on ESP32, homemade MIDI instrument to connect your phone/computer etc. for music playing.

## The Birth of the Water Thermometer

A 32-bit microcontroller based water thermometer is made. The intention is to show the whole process of product development, what steps should be followed and to give an idea of the product. The full picture of product development and learning to make it.

## Electronics DIY

**Trolley Race:** A follow-up to the Idea Trolley DIY, participants bring their creations to compete in a trolley race.

**Hardware Concert:** A follow-up event for simple electronic instruments, and perform in free ensembles.

**"Weld" Challenge:** Welding, the necessary skills for hardware engineers; a competitive competition to see who is the real "Weld" !

**Popular technology lectures:** For the current popular technology, we invite experts to speak and solve the problems, to expand engineers' knowledge and deepen their understanding.

**Workplace Tweets:** We invite engineers who have been working for years to share their work experience and tips. Come here to share all of your workplace experience.

## Offline interaction

# New channels for our services

## ● Third-party platforms:

With the help of third-party platforms, we will fully expand the coverage of EEPW services. In 2022, we will continue to build EEPW WeChat, Bilibili video, EEPW high school WeChat, as well as accounts on third-party platforms such as EEPW's Headline, Tiktok and Baidu Baike, so to provide more developers with electronic information technology services on the one hand, and allow EEPW's original articles to be distributed to a wider group of users on the other.

## ● Social groups:

EEPW has more than 40,000 fans in WeChat and QQ groups for developers. In 2022, we will continue to expand the existing fan base, using full advantages of social media communication, organize regular fan activities in the WeChat and QQ groups, and drive the fans to actively participate in various activities by giving back. Meanwhile, combined with the existing forum activities of EEPW, small groups will be organized regularly activities to better segment the technical field and provide more professional technical information services for segmented developers.

● **Rich Media Matrix:** In 2022, EEPW will launch a multimedia content distribution service that will allow us to shoot and customize all kinds of videos. Throughout the year, we plan to release nearly 40 videos with more than 20 hours of technical training for developers to help them quickly master the latest technology development techniques.

We will also produce our own video commentary program and invite key guests from home and abroad to provide a comprehensive view of the industry from different perspectives, both domestic and international, in this highly visible semiconductor industry. In addition, EEPW will also produce a series of humanities themed programs focusing on the creator and electronics enthusiast community in conjunction with the changing culture of creators, so that we can reacquaint ourselves with the spirit of creators and recover the sentiment inherent in electronics technology development.

# EEPW Original Video Section

# Virtual Showroom

Using digital modeling technology, the audience can watch the 3D virtual exhibition hall scenes and virtual roaming through free operation, realizing the same feeling as entering the scene.

## Pros.

- It's more convenient. You don't have to go to your destination to visit the virtual pavilion, you can just take out your phone or turn on your computer at home and browse.
- More interactive. VR exhibition can be multi-angle, digital simulation of the scene, the user in the process of visiting the virtual exhibition, can interact through mobile phones, tablets, computers and other devices.
- Breaks the traditional exhibition's time and space constraints, making the exchange of information more convenient.

The virtual narrator, with its vivid and cute image, and the roaming route carefully designed by our EEPW, provides a detailed insight into the advantages of each manufacturer.

The 3D models and interaction design allow for a more detailed display of various products and interactions between them, allowing for small simulations to complete smart IoT systems.

These displays make it even more possible to click directly on the manufacturer's links to make product inquiries.

# EEPW

## Exhibition Service

We have over 25 years of experience in organizing and planning conferences, including large forums, exhibitions, academic presentations and other smaller conferences. Although we have our own branded conferences, we also work with industry partners or host conferences. We have organized numerous business forums, academic conferences, exhibitions, roadshows, seminars and competitions offline as well as online, webinars and live streaming.

**Professionalism:** Successful experience in independently holding more than 1,000 Internet of Things developers summit forum

**Technical Strength:** China and foreign industry chain industry leaders, well-known experts, R & D institutions and many application developers

**Appeal:** more than 120 media partners can work together to promote the event

**Multi-platform publishing:** EEPW website, Bilibili, wechat, Tiktok, and traditional magazines

**Precise positioning:** We have nearly 1 million members in various ICT related industries

**Partners:** To maintain long-term cooperative relations with many well-known enterprises at home and abroad

## Our Services

Organizer	Agenda design	Guest invitation
Audience recruitment	Venue service	
Posters	Publicity&promotion	Post summary
Press conference	Venue setup	Interviews
Media Invitations	Post Interview	Multichannel Report

## Designing Competition

### Competition theme

According to the requirements, design the competition theme

### Invitation of Judges

Invite industry experts to form a professional jury

### Question Design

Invite top industry professionals to design the most cutting-edge competition questions

### Competition schedule

The schedule is determined according to the format and questions.

### Team recruitment

A team of highly talented people from society or universities

### Award Ceremony

Award ceremony for the winning team

## 2022 EEPW Meeting Plan (tentative)

Conference Title	Conference Location	Conference Time	The number of expectation
Winning Motor Control	Online	2022.04	350-450
International Conference on Test Equipment Applications	Online+Offline	TBC	300
Efficient Power Supply Design and Carbon Neutral Solutions	Online+Offline	2022.06	300-400
IoT Developer Summer Bash Week	Online	2022.07	2500-3000
Artificial Intelligence Technology Workshop	Offline	2002.08	150-200
Electric Vehicle and Charging Pile Technology Forum	Online+Offline	2022.09	300-400
High School Technology Forum	All over the country	2022.09-10	150-200/round
Artificial Intelligence and IoT Applications	Online+Offline	2022.10	150-200
IoT Developer Winter Warm-Up Week	Online	2022.12	2500-3000
IoT Developer Carnival	BeijingOnline	2022.12	1000-1200

In the past two years, we had to move many offline activities to online because of the epidemic. In 2022, we will follow the national epidemic prevention policy and carry out more conference services according to the actual situation, and strive to go offline and join hands with vendors and readers to communicate face to face. At the same time, we will also join hands with leading enterprises to hold dozens of online technical Webinar to help the majority of developers grasp the new direction of technology development without leaving home.

EEPW online meeting service platform, long-term cooperation with the industry's leading online meeting service providers, to provide a simple and stable and powerful live online meeting platform, and provide detailed meeting information data reports and analysis, is the ideal platform for your technical communication and training.

新闻中心 EEPW首页 > 汽车电子 > 业界动态 > 电动汽车：“锂电派”的气剑之争

### 电动汽车：“锂电派”的“气剑之争”

作者： 时间：2017-12-11 来源：电池中国

**B6** 

**B8** 

金福先生在《笑傲江湖》里设置了一个有趣的背景，那便是华山的“剑宗”和“气宗”之争。先生匠心独运，想要表达和影射的东西太多，在此不便一一分析。单纯从学术角度上来看，“剑宗”和“气宗”之争，只是在一个终极问题的解答过程中，有关条件域选择上的分歧。

本文引用地址：  
http://www.eepw.com.cn/article/201712/372743.htm

拿新能源汽车来说，整个新能源汽车产业就像是一个大武林，跨界造车的电池企业，可以把它们看成是其中的“锂电派”，“锂电派”的门徒们对终极问题的理解也不相同，他们的选择从基础研发布局，厚积薄发；有的选择收购现有企业，神功速成，先发制人。虽“剑”相同而“道”不同，从而演变出今天“锂电派”的“气剑之争”。

所谓：天下武功，唯快不破。“锂电派剑宗一脉”，凭借扎实的“功力”，凌厉的“剑势”，迅速发迹，声名鹊起。

江湖传闻，银隆新能源早年习得钛酸锂“剑法”，一手“快充奇剑”出神入化。早在2012-2013年间，银隆新能源就先后成功整合珠海广通汽车、石家庄中博汽车等汽车制造企业，习得上乘“内功”，拥有国内整车制造资质。近年来，银隆新能源内外兼修，在国内新能源汽车市场打出一片天地，更是赢得江湖前辈“董小姐”的赏识，联合一众江湖前辈为银隆新能源输送“内力”，颇有当年“无崖子传内力于虚竹和尚”的感觉。凭借产品极强的耐温特性，在安全
