ECiNews France is published by European Business Press, SA (EBP) headquartered in Belgium. EBP has been championing the European Electronics Industries through print magazines, websites, and other digital media offerings.

ECiNews magazine is delivered bi-monthly to 19,475 qualified readers and provides in-depth coverage of news, technologies, new products, application notes and more.

ECiNews.fr and daily Newsletters offer industry news and editorial that is timely and to-the-point, allowing for quick reading and decision making when looking for new products or technologies for a design.

In addition to on-going coverage of new products, technologies and economic news, you will find application specific articles, interviews, event coverage, white papers and webinars.

Moreover, as Automotive Electronics is becoming increasingly important, particularly with the electrification of vehicles, infotainment or autonomous driving, we have decided to devote a focus on this subject in each issue. All ECiNews issues feature several pages dedicated to New Products and Announcements in the Automotive field, in addition to the other special themes.
