Circuit Digest

Circuit Digest is a huge community of Engineers and Makers, who are passionate about Electronics and Technology. It is driven with a mission of creating a complete ecosystem for Engineers, Designers, Manufacturers and Distributors to thrive together as a single community to serve the fastest growing Electronics Industry across India and Globe.

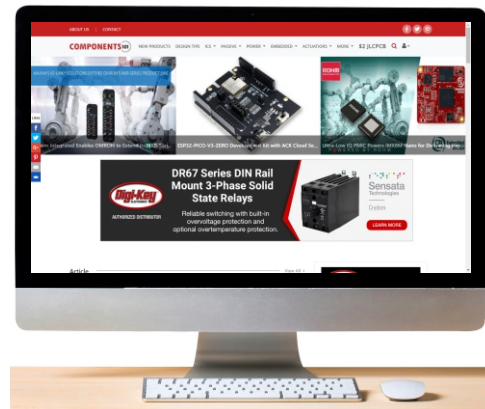

circuitdigest.com

Components101

Components101 is a resource for electronics design engineers to analyze and select the right component for their designs. Our well curated content on newly launched semiconductor component and articles, inspire electronic engineers to design and innovate using the latest technology available in the market.

IoTDesignPRO

IoTDesignPro is a one-of-a-kind, Internet of Things Community focused on exploring the latest advancements and technologies in the field of IoT. Our specialized content addresses the needs of IoT Ecosystem and helps engineers and designers to learn and build IoT based designs.

Assembling the TDA2822 Stereo Amplifier Board

After a few days of ordering, we received our TDA2822 PCB board in a neat package and the PCB quality was good as always. The top layer and the bottom layer of the board are shown below:

After making sure the tracks and footprints were correct, I proceeded with assembling the PCB. The completely soldered board looked as shown in the image below:

The Newest Products for Your Newest Designs®

Chance to win Infineon's REF62WFLY1700VSiC Reference Board

Looking to accelerate the design of auxiliary power supplies for 3-phase converters? Infineon's REF62WFLY1700VSiC Reference Board is intended for developing applications with 3-phase systems that have a high input voltage DC link. The board uses a 1700V CoolSiC™ MOSFET as the main switch, which is well suited for high input voltage DC link, with single-ended flyback topology. Click the link below to learn more and for a chance to win this reference board for your next project.
